# IMPORTER SECURITY FILING

Our Solutions...Your Success

## NETWIN ISF

With the regrouping of the senior management and key personnel that were behind the successful operations of ISSI, Netwin Solutions is poised to become a leader in the International Trade and Logistics arena. Our mission is to empower our customers to manage an efficient logistics and customs operation through our easy to use software solutions and outstanding customer support.

## ABOUT ISF

Importer Security Filing, commonly known as 10+2, is a Customs and Border Protection (CBP) regulation requiring importers and vessel carriers to provide advance data elements to CBP for non-bulk cargo shipments arriving into the United States by vessel. Importer Security Filing goes into effect January 26th 2009.

Netwin Solution announces the launch of its 10+2 solution for Importer Security Filing.

Our Solutions....Your Success

## SOME KEY FEATURES OF OUR SOLUTION ARE:

**User Friendly screens** – Netwin 10+2 screens are very intuitive and user friendly minimizing the training needs for the users.

**Code Driven** – Most of our fields are code driven and are supported by master code tables. Create a code with all the static information once and reuse the code multiple times at the time of data entry thereby minimizing the time taken to complete the transaction

**Defaults and Validations** – With defaults and validations built in at various levels, the system eliminates the need for data entry thereby minimizing errors resulting due to incorrect data entry

**Notifications and Alerts** – Throughout the system and through e-mail notifications the user has complete and instant visibility to various events happening through the life cycle of a transaction

Our Solutions....Your Success

**Reporting** – Netwin 10+2 system is designed to provide the user with ability to search and filter for information based on various parameters within the system and create reports with the information extracted that can be easily shared with other users within and external to your organization

**Integration** – Netwin 10+2 system can be easily integrated with external applications through standard and custom integration mechanisms such as XML, CSV, Web Service and EDI, to share information thereby minimizing redundant data entry

**Security** – Netwin 10+2 system access and user permissions are controlled by a Role based security, a role to each user login.

**Full ABI functionality for 10+2** – Netwin 10+2 system supports both the ISF 5 and ISF 10 transaction types under the 10+2 program and allows transmission of all required and optional elements as defined in the customs catalog for 10+2

**Our Solutions....Your Success**

**On-line Help** – A customizable on-line help is provided along with the system. The user has the option to customize the help content to best fit their needs by modifying the underlying HTML file.

**Multiple deployment architecture** – Whether you want to deploy it as a web based solution or as a windows client solution, we have a system to meet your requirements. If you do not want the hassles of the managing and maintaining the servers, the system can be used from one of our state of the art and secure partner hosting centers.

**Flexible Design** – Our system is designed to support the requirements of self filing importers as well as customs brokers supporting multiple Importers, Talk to us on how our system can streamline and simplify your 10+2 filing.

**Our Solutions....Your Success**
